Built to build your business.

Don't just keep up with your competition—pass them like a Sprinter. Built smarter from the ground up, the Sprinter Cargo Van created the blueprint for the hard-working commercial van. Over the course of five million miles and 17,000 quality checkpoints, the Sprinter was rigorously tested to ensure your business is powered by the most advanced, spacious, and reliable commercial van available.

Start with the Sprinter Cargo Van's cavernous interior space, tall standing height, available Super High Roof, 5'x8' load floor, and class-leading payload capacities that give you all the room you need to succeed.

A fuel-saving turbo diesel engine and class-leading service intervals up to 20,000 miles can help raise your productivity and lower your cost of ownership. If the strength of your business relies on the performance of your cargo van, the Sprinter has everything you're looking for—and more.

"For fuel economy, the Mercedes-Benz has a leg up on its Ford, GM, and Nissan rivals thanks to its choice of diesel-powered engines."

Mercedes Sprinter was almost exactly like driving a minivan — except that I had to be constantly aware of the vehicle's height and length.

The central touchscreen infotainment system offers all the usual stuff, from GPS navigation to SiriusXM radio to USB connectivity and Bluetooth device-pairing.

The seating capacity of a Sprinter passenger van can vary depending on the specific model and configuration. It can range from 12 to 19 passengers.

The Sprinter can haul people but also a lot of stuff in this cavernous cargo area.

Start by carefully planning and designing the interior layout based on your intended use. Consider factors like seating, sleeping arrangements, storage, and amenities.

Install any additional furniture, fixtures, or accessories to complete the interior, such as tables, seating cushions, curtains, and window coverings.
